THE BEST DOCTOR.

Rev. B. C. Horton, Sulphur Springs, Texas, writes, July 19th, 1899: "I have used in my family Ballard's Snow Liniment and Horehound Syrup, and they have proved certainly satisfactory. The liniment is the best we have ever used for headache and pains. The cough syrup has been our doctor for the last eight years." 25c, 50c, \$1.00. Sold by Hinde Drug Co.

Odd Slot Machine Feature.
Itinerant Italians who grind out ragtime on hurdy-gurdies in the streets have adopted a new "get-rich-quick" scheme. The more elaborate of these organs formerly had moving pictures and dancing figures that were set in motion by the turning of the crank handle. The spirit of "something for nothing" appealed so strongly to one of these "grinders," so that now it is necessary to drop a cent in the slot attached to the hurdy-gurdy to start the show.—N. Y. Post.

Pope's Official Designation.
The official designation of the head of the hierarchy of the Catholic church is as follows: His holiness, the pope, bishop of Rome and vicar of Jesus Christ, successor of St. Peter, prince of the apostles; supreme pontiff of the universal church, patriarch of the west, primate of Italy, archbishop and metropolitan of the Roman province, sovereign of the temporal dominions of the holy Roman church.

A Mild Rebuke.
A college student who had more money than brains once entered Dean Van Amringe's lecture room, and, advancing to the desk, began to state his business without removing his hat. "Excuse me a moment," said the professor, rising. He went to a corner of the lecture room and returned with his hat in his hand. Putting it on and sitting down again he turned to the student and said: "Now, sir, you may go on."—N. Y. Times.

Sunstroke Not Due to Heat.
The actinic rays of sunlight, and not the heat rays, appear to be the cause of sunstroke. A British physician recalls that a traveler in India reached this conclusion after noticing that the great heat of the furnaces was easily endured, and this man acted on his theory by protecting his body from the chemical rays by orange-colored clothing. In five years of subsequent severe exposure he suffered no ill effects from the sun.

A Matter of Environment.
"Sir," began the beggar, approaching a promenade on Bongtong square, "I am in distress."
"Here's a nickel for you," said the promenade, proffering the coin.
"Pardon me," replied the beggar scornfully, "but I cannot accept anything less than a dime on a fashionable street like this."—Philadelphia Press.

A Confession.
"You used to speak disparagingly of the school of acting."
"Yes," answered Mr. Stormington Barnes. "But that was some time ago. I am now prepared to say that it should be encouraged as an offset to the prize ring in preparing people for the stage."—Washington Star.

International Industries.
Three-fourths of the great mass of manufacturers which enter into international commerce are composed of iron and steel, copper and cotton, of which we are the world's largest producers, and for the manufacture of which we have facilities at least equal to those of any other country.

Hydrophobia from Mule Bite.
Almost a month ago J. R. Porter, of Northboro, Mo., was bitten by a vicious mule. The wound did not heal well and Porter went to the Pasteur Institute in Chicago. There he was told that he had hydrophobia.

Water Buffaloes.
A firm in Shanghai has been awarded the contract for furnishing 110,000 water buffaloes to the insular government of the Philippines, in lots of 500 monthly. All will be immunized against rinderpest before leaving China.

Inherited Wealth in France.
Legacies to the amount of \$1,075,000,000 were made over to heirs in France in 1902; 381 of the testators left from \$200,000 to \$1,000,000 each, while 27 left over \$1,000,000 each.

Still Mourn for Nelson.
The black silk handkerchief which British bluejackets wear was first tied around the sailors' throats in mourning for Nelson, and it was never dropped.

Gullotine for Fowls.
A gullotine for the painless decapitation of fowls purchased by the public has been installed in the market of Gothenburg by the Society of the prevention of Cruelty to Animals.

Passes for Legislators.
The Canadian railways are obliged by the terms of the new railway company bill to carry members of the Canadian senate and house of commons free.

Fish with Two Stomachs.
A line fisherman outside Quoddy Head, Me., caught a freak codfish recently. The fish had two distinct stomachs, one above the other in the food canal.

Letters for Big City.
London took about 29 per cent. of the whole number of letters delivered in the United Kingdom in the last fiscal year.

Savings of Germans.
Deposits in German savings banks last year amounted to no less than 9,000,000,000 marks, or about \$2,000,000,000.

The Nicotine Plant.
That nicotine is necessary to the nutrition of the tobacco plant and not waste product is shown by an Italian botanist.

Japan Imports Watches.
Japan imported last year \$1,674,000 worth of watches, four-fifths of them from Switzerland.

Capable of Affection.
The lion is the only wild animal that is capable of affection.

Why Suffer with Backache?

I have suffered several years with backache, and after taking one bottle of

I have been cured. Since then I have not been troubled with my back. Too much can not be said in my praise. Capt. Wm. Forrest, Memphis, Tenn. Price 50 cents and \$1.00. For sale by C. O. Proud, Oregon, Mo.

Attention Farmers.

Why remain in the North and stay in doors six months in the year consuming what you raise during the other six months?
Go South where you can work out doors every month in the year, and where you are producing something the year 'round. If you are a stock raiser you know your stock are now "eating their heads off" and, besides, have to be protected from the rigors of winter by expensive shelter.

Economical stock feeding requires the combination of both flesh-forming and fat-forming foods in certain proportions. Alabama and Florida produce in abundance the velvet bean and cassava, the first a flesh producer, and the latter a fat producer, and they are the cheapest and best fattening materials known to the world.

More money can be made and with less labor, in general farming, fruit and berry-growing and truck-gardening along our road in the South than in any other section of the Union.

Cures Winter Cough.

J. E. Gover, 101 N. Main St., Ottawa, Kan., writes: "Every fall it has been my wife's trouble to catch a severe cold, and therefore to cough all winter long. Last fall I got for her a bottle of Horehound Syrup. She used it and has been able to sleep soundly all night long. Whenever the cough troubles her, two or three doses stops the cough, and she is able to be up and well." 25c, 50c, \$1.00. Sold by Hinde Drug Co.

Notice of Final Settlement.

Notice is hereby given, That the undersigned executrix of the estate of Daniel Zook, deceased, will make final settlement of his accounts with said estate as such executrix at the next term of the Probate Court of Holt County, Missouri, to be holden in Oregon in said county, on the 9th day of November A. D. 1903. MRS. A. B. ZOOK, Executrix. This 30th day of September, 1903.

A Remarkable Instrument.
An instrument for observing parts of machines having rapid motion has been made for Prof. Hospitalier, a French investigator. It is designed to light up the rapidly moving parts—such as the exhaust valve of a high-speed petrol motor—with intermittent flashes of variable period, and when the flashes occur regularly at every cycle of motion the part appears quite stationary. On slightly decreasing the period of the flashes, the motion appears to run through its complete cycle at a very slow speed, every vibration being observable.

Speed of Warships.
Those unfamiliar with the differences in the construction of ships made for war and peace may wonder that the speed of 13.1 knots an hour maintained by the Kearsarge is a cause of jubilation, when passenger steamers make more than 20 knots. The passenger ship being built for speed is given a length ten times her beam measurement, while in the floating battery, the proportion is but five to one. The "liner" uses 25,000 to 37,000 horsepower, while the Kearsarge used but 6,500.

The Painter's Palette.
A well-known landscape painter was busy "dashing in" the colors of a sunset. The tints were hurriedly conveyed from the palette to canvases, for the artist was anxious to catch the effect. A rustic standing by observed the operation for a little while and then remarked: "Ah, you be a-painting two pictures at once. That's clever." He paused a moment and then blurted out: "I like that picture best—the one you've got your thumb through!"

Earthquake Zones.
A zone of 15 degrees on a great circle between the Pacific coast of America and Asia is found by M. de Montessus to include the epicentres of 64,000 earthquake localities; and a like zone on a great circle running through the Mediterranean, Caucasus, Himalayas, India, New Zealand and the Antilles embraces 84,000 epicenters. Beyond these zones centers of earthquake disturbances are comparatively few.

A Sportsman's Paradise.
Lake Neuchatel is a kind of sportsman's paradise. A gentleman of Gletterns, in Fribourg, using the net from a boat near Chevroux the other day, drew out two trout, of which one is locally reported to have weighed 29 pounds and the other 19 pounds. His total catch, besides these two monsters of the trout kind, weighed 100 pounds.

Magnificent Throne Room.
It is claimed that the throne room in the royal palace in Amsterdam is the most magnificent hall room in Europe. The throne room was most beautifully ornamented in the seventeenth century by Dutch sculptors and painters. It is 144 feet in length, 62 feet wide and 104 feet high.

Women in the Colleges.
Women constitute nearly 30 per cent. of all college students in the really important colleges of the country, and women graduates of these institutions in the United States, both co-educational and women's colleges, number about 20,000.

Cooperation in England.
In England alone the volume of cooperative business has grown, in the last 40 years, more than 40 times as fast as England's international trade, 100 times as fast as her manufactures and 130 times as fast as the population.

Will Help Photographers.
An interesting French discovery is that an arc lamp using carbons with a core of carbide of iron, will make blue prints and other photographic impressions three times as rapidly as a lamp with ordinary carbons.

Improved Engine Boilers.
Such has been the improvement in engine boilers and fire boxes that the power derived from a pound of coal today is nearly three times as great as it was 50 years ago.

Wholesale Disinfection.
A radical plan for getting rid of the plague has been suggested at Bombay, that of removing 300,000 people and thoroughly disinfecting their homes.

In the Interests of Safety.
Locomotive rides by royal personages have been officially forbidden on German railways, because of the danger of distracting the engineer's attention.

Long Hours for Girls.
Of 397,714 females over sixteen years old in Prussian factories and mines it has been found that 38 per cent. work more than ten hours per day.

In Massachusetts.
The native-born in Massachusetts are not reproducing themselves. They have fewer children than the French have.

SAVED HIS LIFE

J. W. Davenport, Wingo, Ky., writes, June 14, 1902: "I want to tell you I believe Ballard's Snow Liniment saved my life. I was under the treatment of two doctors, and they told me one of my lungs was entirely gone, and the other badly affected. I also had a lump in my side. I don't think that I could have lived over two months longer. I was induced by a friend to try Ballard's Snow Liniment. The first application gave me great relief; two fifty cent bottles cured me sound and well. It is a wonderful medicine and I recommend it to suffering humanity." 25c, 50c, \$1.00. Sold by Hinde Drug Co.

Confessions of a Priest.
